

videomagic

get the best seats  
in the house ready...

have your home videos professionally  
edited so you can watch them over & over

You've bought the video camera and taken reams of film.  
What happens next? They sit on a shelf collecting dust... right?

Whether it's your summer holiday, kids at the zoo or honeymoon to Thailand, there is an easy, affordable way to make your home videos more watchable.

## choose from the following services...

### director's cut

The key moments of your video are carefully selected, edited and synchronised to a favourite soundtrack. The end result is closer to a music video that you can watch over and over.

### cleansing

Our editors improve the quality of the video by carefully eliminating poor quality images, improving lighting conditions and adding transitions.

### reformatting

This option is for customers who simply want to convert their home videos into a format that will play on their television or computer.

### tailoring

Some customers may have unique requirements. For example, you may want to merge 2 or 3 tapes into one and add your own music. Whatever your editing needs are, we can help.
